

Bob Johnson

Data Engineer | Spark & SQL Expert

Email: bob.johnson@example.com | Phone: (555) 043-7654 | Location: Austin, TX

Professional Summary

Results-oriented Data Engineer with 6 years of experience designing and managing large-scale data pipelines. Proficient in Python scripting, distributed computing, database schema optimization, and ETL infrastructure.

Skills

- Programming: Python, Scala, SQL
- Big Data: Apache Spark, Hadoop, Hive
- Databases: PostgreSQL, MongoDB, Snowflake, Redshift
- DevOps: Docker, AWS (S3, EMR, RDS), Airflow, Git

Experience

Senior Data Engineer | DataSys (2023 - Present)

- Engineered Spark-based batch jobs processing 10TB+ of daily log data.
- Optimized SQL queries and indexing in Snowflake, reducing query costs by 20%.
- Orchestrated automated ETL workflows using Apache Airflow and Docker.

Data Engineer | CloudSolutions (2020 - 2023)

- Developed data extraction scripts in Python for multiple SaaS API endpoints.
- Migrated legacy Postgres database to cloud-based Snowflake data warehouse.
- Modeled and created robust schema architectures for analytical reports.

Education

B.S. in Computer Engineering | University of Texas at Austin (2016 - 2020)
